X097 Introduction	5
Modified pages	7

1 Introduction to Modified Pages

This document is addenda to the X12N Health Care Claim: Dental Implementation Guide, originally published May 2000 as 004010X097. As a result of the post publication review process, items were identified that could be considered impediments to implementation. These items were passed to the X12N Health Care Work Group that created the original Implementation Guide for their review.

Appropriate modifications make up the contents of this Draft Addenda to the X12N 004010X097 Implementation Guide published in May 2000. Since this guide is named for use under HIPAA, this is a Draft Addenda that will go through a Notice of Proposed Rule Making (NPRM) process, just as the original Implementation Guide did, before becoming a final addenda to the guide published by X12N. Only the modifications noted in this Draft Addenda will be considered in the NPRM. Once this Draft addenda is approved for publication by X12N, the value used in GS08 will be "004010X097A1".

Each of the changes made to the 004010X097 Implementation Guide have been annotated with a note in red and a line pointing to the location of the change. For convenience, the affected 004010X097 Implementation Guide page number is noted at the bottom of the page. Please note that as a result of insertion or deletion of material each addenda page may not begin or end at the same place as the original referenced page. Because of this, addenda pages are not page for page replacements and the original pages should be retained.

Reference to segments that have been deleted will only appear in the Table 1 and Table 2 diagrams for this transaction beginning on page 45.

Please note that changes in the addenda may have caused changes to the Data Element Dictionary and the Data Element Name Index (Appendix E in the original Implementation Guide), but are not identified in these draft addenda. Changes in the addenda may also have caused changed to the Examples and the EDI Transmission Examples (Section 4 in the original Implementation Guide), but are not identified in these draft addenda.

1.1 Overall Change Summary

All N2 Additional Name Information Segments have been deleted.

A note for the code identifying Home Infusion EDI Coalition (HIEC) Procedure/Service codes was added.

The code for identifying National Drug Codes (NDC) has changed to be standard across all X12N Health Care guides.

Other requirements and notes have been changed.

IMPLEMENTATION

837 Health Care Claim: Dental

1. The 837 transaction is designed to transmit one or more claims for each billing provider. The hierarchy of the looping structure is as follows: billing provider, subscriber, patient, claim level, and claim service line level. Billing providers who sort claims using this hierarchy use the 837 more efficiently because information that applies to all lower levels in the hierarchy does not have to be repeated within the transaction.
2. The developers of this implementation guide also recommend this standard for submitting similar data within a prepaid managed care context. Referred to as “capitated encounters,” this data usually does not result in a payment, though it is possible to submit a mixed claim that includes both prepaid and request for payment services. This standard allows for the submission of data from providers of health care products and services to a Managed Care Organization or other payer. This standard may be used by payers to share data with plan sponsors, employers, regulatory entities, and Community Health Information Networks.
3. This standard also can be used as a transaction set in support of the Coordination of Benefits (COB) claims process. Additional looped segments can be used within both the claim and service line levels to transfer each payer’s adjudication information to subsequent payers.

N2 Segment Deleted

Table 2 - Patient Detail

For purposes of this documentation, the claim detail information is presented only in the dependent level. Specific claim detail information can be given in either the subscriber or the dependent hierarchical level. Because of this the claim information is said to "float." Claim information is positioned in the same hierarchical level that describes its owner-participant, either the subscriber or the dependent. In other words, the claim information, loop 2300, is placed following loop 2010BC in the subscriber hierarchical level when the patient is the subscriber, or it is placed at the patient/dependent hierarchical level when the patient is the dependent of the subscriber as shown here. When the patient is the subscriber, loops 2000C and 2010CA are not sent. See 2.3.2.1, HL Segment, for details.

			Note Changed	
			When piloting the transaction set, this value is 004010X097DA1.	
			When sending the transaction set in a production mode, this value is 004010X097A1.	

IMPLEMENTATION

**BILLING/PAY-TO PROVIDER SPECIALTY
INFORMATION**

Loop: 2000A — BILLING/PAY-TO PROVIDER HIERARCHICAL LEVEL

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Required when adjudication is known to be impacted by the provider taxonomy code, and the Rendering Provider is the same entity as the Billing and/or Pay-to Provider. In these cases, the Rendering Provider is being identified at this level for all subsequent claims/encounters in this HL and Loop ID-2310B is not used.

Note 1. Changed

2. If the Billing or Pay-to Provider is also the Rendering Provider, and Loop 2310B is not used, this PRV segment is required.

3. This PRV is not used when the Billing or Pay-to Provider is a group and the individual Rendering Provider is in Loop ID-2310B. The PRV segment is then coded with the Rendering Provider in Loop ID-2310B.

4. PRV02 qualifies PRV03.

Example: PRV*PT*ZZ*1223S0112Y~

STANDARD

PRV Provider Information

Level: Detail

IMPLEMENTATION

PAYER CITY/STATE/ZIP CODE

Loop: 2010BB — PAYER NAME

Usage: SITUATIONAL

Repeat: 1

Notes: 1. Payer Address is required when the Submitter intends for the claim to be printed to paper at the next EDI location (e.g., clearinghouse).

Example: N4*CENTERVILLE*PA*17111~

STANDARD

N4 Geographic Location

Level: Detail

Position: 030

Loop: 2010

Requirement: Optional

Max Use: 1

Purpose: To specify the geographic place of the named party

Syntax: 1. C0605
If N406 is present, then N405 is required.

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REQUIRED	N401	19	City Name Free-form text for city name <i>INDUSTRY: Payer City Name</i> <i>ALIAS: Payer's City</i> COMMENT: A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location. NSF Reference: DA1-06.0	O AN 2/30

Note Deleted

REQUIRED	CLM05	C023	HEALTH CARE SERVICE LOCATION INFORMATION			O						
To provide information that identifies the place of service or the type of bill related to the location at which a health care service was rendered												
ALIAS: <i>Place of Service Code</i>												
NSF Reference:												
FA0-07.0												
CLM05 applies to all service lines unless it is over written at the line level.												
REQUIRED	CLM05 - 1	1331	Facility Code Value	M	AN	1/2						
Code identifying the type of facility where services were performed; the first and second positions of the Uniform Bill Type code or the Place of Service code from the Electronic Media Claims National Standard Format												
INDUSTRY: <i>Facility Type Code</i>												
Use this element for codes identifying a place of service from code source 237. As a courtesy, the codes are listed below; however, the code list is thought to be complete at the time of publication of this implementation guide. Since this list is subject to change, only codes contained in the document available from code source 237 are to be supported in this transaction and take precedence over any and all codes listed here.												
11 Office												
12 Home												
21 Inpatient Hospital												
22 Outpatient Hospital												
31 Skilled Nursing Facility												
35 Adult Living Care Facility												
NOT USED	CLM05 - 2	1332	Facility Code Qualifier	O	ID	1/2						
REQUIRED	CLM05 - 3	1325	Claim Frequency Type Code	O	ID	1/1						
Code specifying the frequency of the claim; this is the third position of the Uniform Billing Claim Form Bill Type												
INDUSTRY: <i>Claim Submission Reason Code</i>												
CODE SOURCE 235: Claim Frequency Type Code												
REQUIRED	CLM06	1073	Yes/No Condition or Response Code	O	ID	1/1						
Code indicating a Yes or No condition or response												
INDUSTRY: <i>Provider or Supplier Signature Indicator</i>												
ALIAS: <i>Provider Signature on File Code</i>												
SEMANTIC: CLM06 is provider signature on file indicator. A "Y" value indicates the provider signature is on file; an "N" value indicates the provider signature is not on file.

CODE	DEFINITION											
N	No											
Y	Yes											

IMPLEMENTATION

**PRIOR AUTHORIZATION OR REFERRAL
NUMBER**

Segment Name Changed

Loop: 2300 — CLAIM INFORMATION

Usage: SITUATIONAL

Repeat: 2 — Repeat Changed

Notes: 1. Numbers at this position apply to the entire claim unless they are overridden in the REF segment in Loop ID-2400. A reference identification is considered to be overridden if the value in REF01 is the same in both the Loop ID-2300 REF segment and the Loop ID-2400 REF segment. In that case, the Loop ID-2400 REF applies only to that specific line.

Note 2. Changed — 2. Required where services on this claim were preauthorized or where a referral is involved. Generally, preauthorization/referral numbers are those numbers assigned by the payer/UMO to authorize a service prior to its being performed. The referral or prior authorization number carried in this REF is specific to the destination payer reported in the 2010BB loop. If other payers have similar numbers for this claim, report that information in the 2330 loop REF which holds that payer's information.

New Note 3. Added — 3. This segment should not be used for Predetermination of Benefits.

Example: REF*9F*12345~

STANDARD

REF Reference Identification

IMPLEMENTATION

ASSISTANT SURGEON NAME

Loop: 2310D — ASSISTANT SURGEON NAME Repeat: 1

Usage: SITUATIONAL

Repeat: 1

- Notes:
1. Information in the Loop ID-2310 applies to the entire claim unless overridden on a service line by the presence of loop ID-2420 with the same value in the NM101.
 2. Because the usage of this segment is “situational” this is not a syntactically required loop. If the loop is used, then it is a “required” segment. See Appendix A for further details on ASC X12 nomenclature and X12 syntax rules.
 3. Required when the Assistant Surgeon information is needed to facilitate reimbursement of the claim.

Example: NM1*AS*SMITH*JOHN*S***34*123456789~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 250

Loop: 2310 Repeat: 9

Requirement: Optional

Max Use: 1

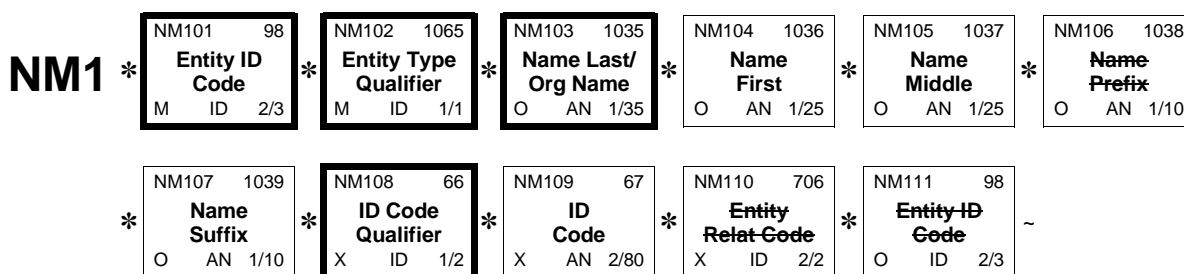

Purpose: To supply the full name of an individual or organizational entity

Set Notes:

1. Loop 2310 contains information about the rendering, referring, or attending provider.

- Syntax:
1. **P0809**
If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
If NM111 is present, then NM110 is required.

IMPLEMENTATION

ASSISTANT SURGEON SPECIALTY
INFORMATION

Loop: 2310D — ASSISTANT SURGEON NAME

Usage: SITUATIONAL

Repeat: 1

- Notes: 1. Information in the Loop ID-2310 applies to the entire claim unless overridden on a service line by the presence of loop ID-2420 with the same value in the NM101.
2. Required when the Assistant Surgeon specialty information is needed to facilitate reimbursement of the claim.

Example: PRV*AS*ZZ*1223S0112Y~

STANDARD

PRV Provider Information

Level: Detail

Position: 255

Loop: 2310

Requirement: Optional

Max Use: 1

Purpose: To specify the identifying characteristics of a provider

IMPLEMENTATION

CLAIM ADJUSTMENT

Loop: 2320 — OTHER SUBSCRIBER INFORMATION

Usage: SITUATIONAL

Repeat: 5

Notes: 1. Submitters should use the CAS segment to report claim level adjustments from prior payers that cause the amount paid to differ from the amount originally charged.

- Note 2. Changed — 2. If it is necessary to send more than one Group Code at the claim level, repeat the CAS segment.
3. Codes and associated amounts should come from the 835s (Remittance Advice) received on the claim. If no previous payments have been made, omit this segment. See the 835 for definitions of the group codes (CAS01).
4. Required if the claim has been adjudicated by payer identified in this loop and has claim level adjustment information.
5. To locate the claim adjustment reason codes that are used in CAS02, 05, 08, 11, 14 and 17 see the Washington Publishing Company website: <http://www.wpc-edi.com>. Follow the buttons to Code Lists - Claim Adjustment Reason Codes.

IMPLEMENTATION

OTHER PAYER PRIOR AUTHORIZATION OR
REFERRAL NUMBER

Loop: 2330B — OTHER PAYER NAME

Segment Name Changed

Usage: SITUATIONAL

Repeat: 2 Repeat Changed

Note 1. Changed 1. Used when the payer identified in this loop has given a prior authorization or referral number to this claim. This element is primarily used in payer-to-payer COB situations.

2. There can only be a maximum of three REF segments in any one iteration of the 2330 loop.

New Note 3. Added 3. This segment should not be used for Predetermination of Benefits.

Example: REF*9F*AB333-Y5~

STANDARD

REF Reference Identification

Level: Detail

Position: 355

Loop: 2330

Requirement: Optional

Max Use: 3

Purpose: To specify identifying information

Syntax: 1. R0203
At least one of REF02 or REF03 is required.

			SYNTAX: R0203	

IMPLEMENTATION

ASSISTANT SURGEON NAME

Loop: 2420C — ASSISTANT SURGEON NAME Repeat: 1

Usage: SITUATIONAL

Repeat: 1

- Notes:
1. Required if the Assistant Surgeon information in this Loop ID-2420C is different from the Assistant Surgeon information supplied in the Loop ID-2310D.
 2. Because the usage of this segment is “situational” this is not a syntactically required loop. If the loop is used, then it is a “required” segment. See Appendix A for further details on ASC X12 nomenclature and X12 syntax rules.
 3. Required when the Assistant Surgeon information is needed to facilitate reimbursement of the claim.

Example: NM1*AS*SMITH*JOHN*S***34*123456789~

STANDARD

NM1 Individual or Organizational Name

Level: Detail

Position: 500

Loop: 2420 Repeat: 10

Requirement: Optional

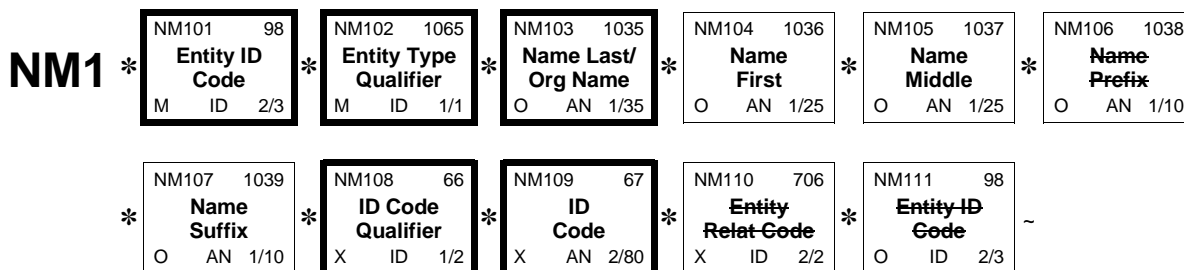

Max Use: 1

Purpose: To supply the full name of an individual or organizational entity

- Set Notes:
1. Loop 2420 contains information about the rendering, referring, or attending provider on a service line level. These segments override the information in the claim - level segments if the entity identifier codes in each NM1 segment are the same.

- Syntax:
1. **P0809**
If either NM108 or NM109 is present, then the other is required.
 2. **C1110**
If NM111 is present, then NM110 is required.

Data elements are assigned a unique reference number. Each data element has a name, description, type, minimum length, and maximum length. For ID type data elements, this guide provides the applicable ASC X12 code values and their descriptions or references where the valid code list can be obtained.

Each data element is assigned a minimum and maximum length. The length of the data element value is the number of character positions used except as noted for numeric, decimal, and binary elements.

The data element types shown in matrix A4, Data Element Types, appear in this implementation guide.

SYMBOL	TYPE
Nn	Numeric
R	Decimal
ID	Identifier
AN	String
DT	Date
TM	Time
B	Binary

Matrix A4. Data Element Types

A.1.3.1.1

Numeric

A numeric data element is represented by one or more digits with an optional leading sign representing a value in the normal base of 10. The value of a numeric data element includes an implied decimal point. It is used when the position of the decimal point within the data is permanently fixed and is not to be transmitted with the data.

This set of guides denotes the number of implied decimal positions. The representation for this data element type is "Nn" where N indicates that it is numeric and n indicates the number of decimal positions to the right of the implied decimal point.

If n is 0, it need not appear in the specification; N is equivalent to N0. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) should not be transmitted.

EXAMPLE

A transmitted value of 1234, when specified as numeric type N2, represents a value of 12.34.

Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. The length of a numeric type data element does not include the optional sign.

A.1.3.1.2

Decimal

A decimal data element may contain an explicit decimal point and is used for numeric values that have a varying number of decimal positions. This data element type is represented as "R."

The decimal point always appears in the character stream if the decimal point is at any place other than the right end. If the value is an integer (decimal point at the right end) the decimal point should be omitted. For negative values, the leading minus sign (-) is used. Absence of a sign indicates a positive value. The plus sign (+) should not be transmitted.

Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point should be suppressed unless necessary to indicate precision. The use of triad separators (for example, the commas in 1,000,000) is expressly prohibited. The length of a decimal type data element does not include the optional leading sign or decimal point.

EXAMPLE

A transmitted value of 12.34 represents a decimal value of 12.34.

New note

For implementation of this guide under the rules promulgated under the Health Insurance Portability and Accountability Act (HIPAA), decimal data elements in Data Element 782 (Monetary Amount) will be limited to a maximum length of 10 characters including reported or implied places for cents (implied value of 00 after the decimal point). Note the statement in the preceding paragraph that the decimal point and leading sign, if sent, are not part of the character count.

A.1.3.1.3

Identifier

An identifier data element always contains a value from a predefined list of codes that is maintained by the ASC X12 Committee or some other body recognized by the Committee. Trailing spaces should be suppressed unless they are necessary to satisfy a minimum length. An identifier is always left justified. The representation for this data element type is "ID."

A.1.3.1.4

String

A string data element is a sequence of any characters from the basic or extended character sets. The significant characters shall be left justified. Leading spaces, when they occur, are presumed to be significant characters. Trailing spaces should be suppressed unless they are necessary to satisfy a minimum length. The representation for this data element type is "AN."

A.1.3.1.5

Date

A date data element is used to express the standard date in either YYMMDD or CCYYMMDD format in which CC is the first two digits of the calendar year, YY is the last two digits of the calendar year, MM is the month (01 to 12), and DD is the day in the month (01 to 31). The representation for this data element type is "DT." Users of this guide should note that all dates within transactions are 8-character dates (millennium compliant) in the format CCYYMMDD. The only date data element that is in format YYMMDD is the Interchange Date data element in the ISA segment, and also used in the TA1 Interchange Acknowledgment, where the century can be readily interpolated because of the nature of an interchange header.

A.1.3.1.6

Time

A time data element is used to express the ISO standard time HHMMSSd..d format in which HH is the hour for a 24 hour clock (00 to 23), MM is the minute (00 to 59), SS is the second (00 to 59) and d..d is decimal seconds. The representation for this data element type is "TM." The length of the data element determines the format of the transmitted time.

EXAMPLE

Transmitted data elements of four characters denote HHMM. Transmitted data elements of six characters denote HHMMSS.

IMPLEMENTATION

FUNCTIONAL GROUP HEADER

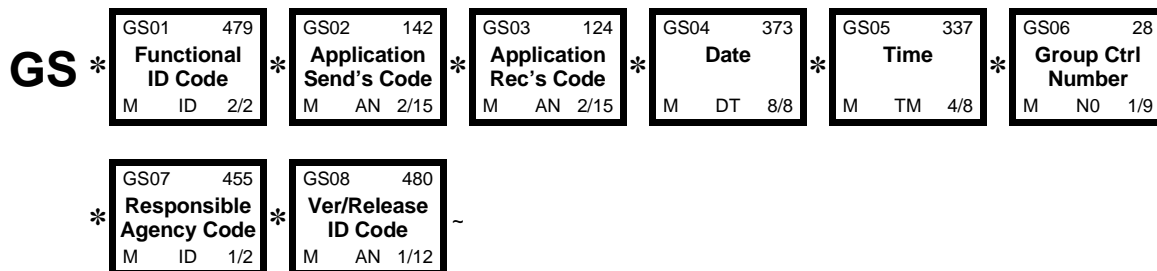

Example: **GS*HC*SENDER CODE*RECEIVER
CODE*19940331*0802*1*X*004010X097A1~** ————— Example changed

STANDARD

GS Functional Group Header

Purpose: To indicate the beginning of a functional group and to provide control information

DIAGRAM

ELEMENT SUMMARY

USAGE	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES						
REQUIRED	GS01	479	Functional Identifier Code Code identifying a group of application related transaction sets	M	ID	2/2				
			<table><tr><th>CODE</th><th>DEFINITION</th></tr><tr><td>HC</td><td>Health Care Claim (837)</td></tr></table>	CODE	DEFINITION	HC	Health Care Claim (837)			
CODE	DEFINITION									
HC	Health Care Claim (837)									
REQUIRED	GS02	142	Application Sender's Code Code identifying party sending transmission; codes agreed to by trading partners	M	AN	2/15				
			Use this code to identify the unit sending the information.							
REQUIRED	GS03	124	Application Receiver's Code Code identifying party receiving transmission. Codes agreed to by trading partners	M	AN	2/15				
			Use this code to identify the unit receiving the information.							
REQUIRED	GS04	373	Date Date expressed as CCYYMMDD SEMANTIC: GS04 is the group date.	M	DT	8/8				
			Use this date for the functional group creation date.							
REQUIRED	GS05	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) SEMANTIC: GS05 is the group time.	M	TM	4/8				
			Use this time for the creation time. The recommended format is HHMM.							

REQUIRED	GS06	28	Group Control Number Assigned number originated and maintained by the sender SEMANTIC: The data interchange control number GS06 in this header must be identical to the same data element in the associated functional group trailer, GE02.	M	NO	1/9				
REQUIRED	GS07	455	Responsible Agency Code Code used in conjunction with Data Element 480 to identify the issuer of the standard	M	ID	1/2				
			<table><tr><th>CODE</th><th>DEFINITION</th></tr><tr><td>X</td><td>Accredited Standards Committee X12</td></tr></table>	CODE	DEFINITION	X	Accredited Standards Committee X12			
CODE	DEFINITION									
X	Accredited Standards Committee X12									
REQUIRED	GS08	480	Version / Release / Industry Identifier Code Code indicating the version, release, subrelease, and industry identifier of the EDI standard being used, including the GS and GE segments; if code in DE455 in GS segment is X, then in DE 480 positions 1-3 are the version number; positions 4-6 are the release and subrelease, level of the version; and positions 7-12 are the industry or trade association identifiers (optionally assigned by user); if code in DE455 in GS segment is T, then other formats are allowed	M	AN	1/12				
			<table><tr><th>CODE</th><th>DEFINITION</th></tr><tr><td>004010X097A1</td><td>Draft Standards Approved for Publication by ASC X12 Procedures Review Board through October 1997, as published in this implementation guide. This is a Draft Addenda to the X12N 004010X097 Implementation Guide published in May 2000 and not yet intended for implementation. Since the 004010X097 guide is named for use under HIPAA, this Draft Addenda must go through a Notice of Proposed Rule Making (NPRM) process, just as the original Implementation Guide did, before becoming a final addenda to the guide published by X12N. Only the modifications noted in this Draft Addenda will be considered in the NPRM. Once this Draft addenda is approved for publication by X12N, the value used in GS08 will be "004010X097A1".</td></tr></table>	CODE	DEFINITION	004010X097A1	Draft Standards Approved for Publication by ASC X12 Procedures Review Board through October 1997, as published in this implementation guide.
